

Meditory LLC.

Transform your information management with the easy and affordable

RxLabelScanner™

- Quickly capture and apply critical patient information
- Reduce data error and liability
- Secure accurate, retrievable images of the prescription label

Designed for healthcare professionals at home healthcare, assisted living, nursing home, hospital, physician office, and pharmacy locations.

- Integrate state of the art SaaS and cloud technologies
- Leverage patent-pending device and software technology
- Facilitate HIPAA compliance

To reduce medication error rates, in-person patient prescription container reviews are required by health care providers, insurers and agencies during home health care visits by caregivers.

The **RxLabelScanner™** converts any prescription, vitamin or over-the-counter label to text via our VersaSmartRead Optical Character Recognition technology.

The revolutionary **RxLabelScanner™** generates the flat image of prescription labels in seconds and sends it via HIPAA approved 256 bit encryption to the cloud for image processing.

Imagine no more missing prescription information on patient medication forms

"Listing medications by hand constitutes a grave risk. Mistakes can have dire consequences for the patient and consequently for the agency owners. Liability insurance constitutes the largest single expenditure after salaries and is our biggest source of anxiety. One can contest handwriting, but there is no contesting a scanned label. Meditory LLC's data management solution provides peace of mind."

Home Care Company Executive

Error-prone paper records are gone. Transcription errors, and messy and expensive multipart forms, compounded by confusing drug names, are everyday issues when you use paper. Can't read a form? Information missing? To get dosage or use instructions, you must make time and labor-intensive phone calls to the patient's family, doctors or pharmacies. If you have a patient with poor eyesight, dementia or other physical and mental issues, getting information is even more difficult.

Patients typically have multiple doctors and multiple pharmacies. Tracking down that missing information can be costly. Meditory's solution helps you avoid regulatory citations, fines and frequent repeat inspections. Not to mention legal liabilities and increased insurance premiums.

You benefit from a revolutionary, complete new intake solution

The RxLabelScanner is:

- **Error-free.** Eradicates manual transcribing mistakes.
- **Cost saving.** Nurse and back-office support is cheaper.
- **Time saving.** The critical intake process is faster.
- **Care improving.** Caregivers focus on patient care rather than transcribing labels and scripts by hand.
- **Compliant.** Avoids fines and citations, accelerates audit response.
- **Fast and complete.** OTC drugs, vitamins and expired prescriptions are often not recorded due to time constraints.

Meditory LLC's Medication Management Solution is:

- **24/7 and secure.** Our Cloud-supported SaaS offering eliminates costly, time-consuming calls to patients, doctors or pharmacies to clear up data errors and missing information.
- **Compliant.** Permanent, complete electronic medication record created. No more aging, illegible or misplaced paper files that can increase liability.
- **Information rich.** Physicians get better drug interaction control with timely, complete and accurate information. Doctors review the actual ingredients of all medicines directly from the label images.
- **Supportive of caregivers in the field.** Print Patient Medication Profile (PMP) forms anywhere, anytime, with small portable printers.
- **Peace of mind for patients.** Patients and relatives may have access anytime to the medication profile in the cloud.
- **Safer.** Drug interaction alerts and notifications services are available.
